SUMMARY

Ambitious Junior Front End Developer brings enthusiasm and detailed understanding of various programming languages to web page planning, development and maintenance. Experience designing and developing sites from concept to roll out. Foundational grasp of various CSS and HTML options, plugins, development platforms, frameworks ex. Angular, React. Goal-driven individual with excellent grasp of Agile Methodologies.

Information Technology Institute "ITI" graduate - Front End development and Cross platform track.

TECHNICAL SKILLS

General	Tools	Languages	Platform / Frameworks
Web development	Visual StudioCode	HTML5, CSS3	Angular 12
Front End Development	GIT	SASS.	React JS.
UI/UX Design		JavaScript (es6).	Bootstrap
		TypeScript.	MongoDB
		Redux.	Firebase
			GraphQL
			PrimeNG.

EXPERIENCE

Software Developer (Full-Time)   ..Nov 1 -Present

We Build Websites LLC (WEBW)

-Staronics - Electronics E-commerce Website:
• Developed a responsive table with advanced functionality, including dynamic data, multiple columns and rows, drop-down menus, and robust error handling.

-Vocab smartergerman - Web application:
• Responsible for revamping legacy JavaScript projects to a newer version of React JS "ex:
   Vocab smartergerman: it's a project that main purpose is to provide online German courses through interactive exercises.

• Developed and designed front-end web applications using mainly ReactJS, Redux, Semantic UI framework, React-Bootstrap .

• Collaborated with backend developers to integrate API data into frontend applications. Utilized RESTful APIs for dynamic content display.

• Optimized data fetching and processing for improved performance. Ensured seamless frontend-backend integration.

• Implemented client-side data validation and error handling mechanisms to ensure data integrity and user-friendly error messages.

• Converted the XD design into web pages.

• Worked efficiently to meet development metrics for time and design standards.

Software Developer (Part-Time) .. May 22 - Present

Devindu

-ADDA (Abu Dhabi Digital Authority) Website:
• Developed and implemented a visually captivating logo component with a foldable side menu. Incorporated complex design elements, advanced interactivity, and responsive behavior.

• Leveraged prime-ng Angular library to streamline development, optimize functionality, and ensure seamless integration of the logo component with the customizable foldable side menu.

-Eskedo (No-Code Platform):
• Developed reusable components and libraries to enhance development efficiency and maintain code consistency.

• Utilized version control systems like Git to track and manage code changes and collaborate with team members.

• Worked closely with stakeholders to understand their requirements and translate them into features and functionalities within the no-code platform.

Front End Developer "Intern" in ITI .. AUG 21 - DEC 21
  • Involved in requirement gathering, analysis, design and development of the application.
  • Established user interface design standards, internationalization considerations, framework guide to enhance developments autonomy.
  • Developed dynamic and static web pages using HTML5, CSS 3, JavaScript and Angular 12..

EDUCATION

  – ## Professional Diploma of Front End and Cross Platform .. AUG 15 2021 - DEC 15 2021

    Information Technology Institute "ITI"

  – ## Bachelor of Electronics and Communication Engineering, .. SEP 2014 - AUG 2019

    High Institute of Engineering and technology, Luxor,

    Accumulated grade: *Very Good* - Graduation Project "Smart Gloves for deafs and dumbs
    Grade: *Very Good.*

PERSONAL PROJECTS

1. Amazon Application (Seagit company):
Technology used: (NextJS, Material UI, MongoDB, React JS and context, Paypal API).
Site :Amazon-Ecommerce

2. CliniDo medical website :
Objective:Book a medical consultation online .
Technology used: (Angular 12, Firebase,   Angular Material, Bootstrap).
Site :   clinido-ce15d.web.app/

3.UI/UX design for WEBW company:
Technology used : (Bootstrap).
Site : webw-ui-ux

4. Educational Website (UI/UX):
Technology used : (Bootstrap - animation.css).
Site : Educationa-website

5. To Do-List for WEBW company:
Objective: The user has to sign up to be able to add his own To-dos. The user can edit and delete the to dos.
Technology used: (Angular 13, Firebase Authentication, Bootstrap).
Site: webw-crud-app

6. React Movie App:
Objective: Get all movies from the API and the user can see movie details and add/remove movies from their favorites.
Site : movie-app

7. My Portfolio:
Technology Used: (Angular 13-Bootstrap)
Site: hafsa-ahmed-portofolio

8.Voice Recognition App for children using Vanilla JavaScript:
Objective: This is an educational app for children to learn words by speaking , listening to different words and repeating them.
Site : Voice-Recognition-with-vanilla-JavaScript

8.Build Browser extension for Google Chrome with translation service API:
